

# DELSTARFORD WORKS (DSW)

## Corporate Business Profile

## 1. EXECUTIVE SUMMARY

### Company Name & Tagline

**Delstarford Works** — *Engineering Intelligent Architectures for a Complex World.*

### Mission Statement

To engineer highly scalable, AI-driven software and analytical architectures that solve complex, real-world challenges across agriculture, healthcare, enterprise business, and institutional security. We combine digital intelligence with physical science to deliver measurable impact.

### Vision Statement

To be the premier Artificial Intelligence and Biotechnology software consortium globally over the next decade, recognized for pioneering the intersection of high-performance computation, life sciences, and secure enterprise technology.

### Core Values

- **Integrity & Transparency:** Absolute honesty in data reporting, financial dealings, and client relations.
- **Excellence & Precision:** A commitment to zero-error rates and rigorous statistical validation in every line of code we ship.
- **Innovation:** Relentlessly pushing the boundaries of machine learning, bioinformatics, and software engineering.
- **Dignity & Respect:** Operating as a flat hierarchy of elite experts where meritocracy and professional respect drive our culture.

## 2. BUSINESS OVERVIEW

### Date of Establishment

January 2026

### Business Structure

Specialized Service Provider Consortium / Private Enterprise

### Location

**Headquarters:** Innovation Academy, Kakamega-Webuye Road, Kakamega Town, Kenya.

*(Serving a Global Clientele)*

## Key Personnel

Delstarford Works is led by **Delstarford Isaiah (Chief Executive Director)**, supported by a governing **High Council** representing our five core domains of expertise. Our leadership team bridges the gap between executive business strategy, advanced software engineering, and the physical sciences.

## 3. PRODUCTS & SERVICES

### Core Offerings

- **AI-Powered Software Solutions:** Custom Web Applications, dynamic Android Applications, and enterprise-grade software systems.
- **Machine Learning & Predictive Modeling:** Custom algorithms, NLP models, and computer vision architectures fine-tuned for specific industry datasets.
- **Biophysical & Biochemical Analysis:** Physical modeling and data-driven lab solutions for Agrotech and Pharmaceutical clients.
- **Data Architecture & Science:** Cleaning, structuring, and visualizing massive datasets for enterprise decision-making.
- **Market Intelligence Reports:** Data-backed economic strategies for investment and growth in East African and Global markets.
- **Personal Consumption:** Software solutions specifically for the business ownership.

### Unique Selling Point (USP)

We do not just write code; we provide an ecosystem of expertise.

- **100% IP Ownership:** Clients retain full Intellectual Property rights to their specific model solutions upon payment.
- **Milestone De-risking:** Our transparent 30/20/50% payment structure ensures client satisfaction at every critical project phase.
- **Multi-Disciplinary:** We are the only consortium in the region combining elite AI developers directly with biochemical and biophysical scientists.

### Target Market

Forward-thinking enterprise businesses, modern healthcare institutions, large-scale agricultural enterprises (Agri-Tech), financial sectors, and security agencies.

## 4. OPERATIONAL CAPACITY

### Infrastructure

DSW operates on a robust, cloud-native technology stack capable of handling heavy computational loads. Our infrastructure includes secure neural processing environments,

scalable fullstack deployment pipelines (Flutter, React, Python/Flask), and integrated wet-lab data validation systems.

### Team Structure & Size

We operate through a highly disciplined, multi-disciplinary consortium divided into five elite "Silos":

1. **The Silicon Silo:** AI Engineers & Machine Learning Architects.
2. **The Analytic Silo:** Data Analysts & Statisticians.
3. **The Insight Silo:** Market Research Analysts & Economists.
4. **The Life Science Silo:** Biochemical Specialists & Lab Technicians.
5. **The Physical Interface Silo:** Biophysical Specialists.

### Partnerships

We actively collaborate with cloud infrastructure providers, digital payment gateways (Stripe, Safaricom M-Pesa), and regional agricultural and healthcare institutions to ensure seamless, end-to-end service delivery.

## 5. TRACK RECORD & MILESTONES

### Major Projects & Architectures

- **UKULIMA SAFI AI:** A comprehensive agricultural intelligence ecosystem designed to monitor soil health, predict weather impacts, and optimize crop yields using IoT and PyTorch.
- **DEXAGEN AI:** A sophisticated neuro-symbolic computational platform engineered for advanced drug development and simulating complex 3D molecular interactions.
- **ANIPRO AI:** A digital de-risking platform connecting smallholder farmers to micro-insurance institutions through automated algorithmic assessments.
- **MIRA AI:** A weather-aware, generative educational companion designed to optimize learning environments in climate-impacted regions.

### Compliance & Certifications

- Fully compliant with the **Data Protection Act (2019)**.
- Strict internal governance enforced by comprehensive NDAs and the DSW Constitutional Framework.

## 6. CORPORATE SOCIAL RESPONSIBILITY (CSR)

### Community Impact

Through solutions like *Ukulima Safi AI* and *AniPro AI*, Delstarford Works directly empowers local communities, smallholder farmers, and regional businesses to leverage technology that was previously only accessible to massive global corporations. Internally, we prioritize our team's welfare through aggressive profit-sharing and a dedicated medical/compassionate support

fund.

### **Sustainability**

Our technology is actively used to fight climate challenges. By engineering climate-aware educational tools and researching salinity-tolerant bio-engines, we are committing our computational power to sustainable food security and environmental resilience.

### **7.WORKERS OF THE BUSSINESS**

## **8. CONTACT INFORMATION**

Ready to integrate AI into your business? Let's get to work.

- **Physical Address:** Innovation Academy, Kakamega-Webuye Road, Kakamega Town, Kenya.
- **Website / Digital Portal:** <https://delstarfordworks.co.ke/>
- **Direct Email:** delstarfordisaiah@gmail.com
- **Phone / WhatsApp:** +254 707 605 751
